

Operators Restart Unit 1 at PPL Susquehanna After Completing Turbine Modifications

BERWICK, Pa., June 14, 2013 /PRNewswire/ -- Operators reconnected the Unit 1 reactor at the Susquehanna nuclear power plant to the regional electric grid Friday (6/14), after completing improvements that will address the turbine issues experienced at the plant over the past several years.

"We will continue to monitor the performance of the turbines on both units over the next few years to confirm the modifications are working as designed," said Timothy S. Rausch, senior vice president and Chief Nuclear Officer.

Unit 2 returned to service June 5, having completed a refueling and maintenance outage.

The Susquehanna plant, located in Luzerne County about seven miles north of Berwick, is owned jointly by PPL Susquehanna LLC and Allegheny Electric Cooperative Inc. and is operated by PPL Susquehanna.

PPL Susquehanna LLC is one of PPL Corporation's generating affiliates. PPL Corporation (NYSE: PPL), with annual revenue of more than \$12 billion, is one of the largest companies in the U.S. utility sector. The PPL family of companies delivers electricity and natural gas to about 10 million customers in the United States and the United Kingdom, owns more than 18,000 megawatts of generating capacity in the United States and sells energy in key U.S. markets.
