

PPL's 'Empowering Educators' Grant Program Helps Deliver Science, Technology, Engineering and Math Projects to Area Schools

Deadline to apply is Nov. 8

PPL Corporation

As part of its continuing partnership with the communities it serves, PPL Corporation is once again offering grants to teachers to help their students learn more about energy, the environment and resource conservation.

Through the competitive "Empowering Educators" grants program, teachers can receive up to \$2,000 for science, technology, engineering and math (STEM) projects to encourage action in schools in Pennsylvania and New Jersey near PPL facilities.

Projects must focus on energy issues, such as renewable energy, efficiency and the greening of schools.

"The students who will benefit from these grants are the people who will decide how our state and nation use energy in the future," said Meg Welker, PPL's manager of Education and Public Outreach. "Continued support of education helps ensure that they will make informed choices."

Applications must be postmarked or received on or before 4 p.m. on Nov. 8. Grant awards will be announced Dec. 9. For more information, and for grant application forms, visit the [Empowering Educators page](#).

If you have a project in mind or need more information about PPL's grants program, please contact Alana Roberts, community affairs specialist, at aroberts@pplweb.com or 570-542-2886.

PPL Corporation (NYSE: PPL), with 2012 revenues of more than \$12 billion, is one of the largest companies in the U.S. utility sector. The PPL family of companies delivers electricity and natural gas to about 10 million customers in the United States and the United Kingdom, owns more than 18,000 megawatts of generating capacity in the United States and sells energy in key U.S. markets. More information is available at www.pplweb.com.
