

# LG&E and KU Electric Vehicle Charging Station Program meets goal

New EV charging stations in Morehead, Richmond and Louisville power utilities’ program to its target

(LOUISVILLE, Ky.) – Electric vehicle drivers and enthusiasts who travel across Kentucky have more reasons to celebrate with more charging infrastructure installed in the state. Three new, publicly-accessible EV charging stations are now in operation as part of Louisville Gas and Electric Company and Kentucky Utilities Company’s EV Charging Station Program.

The new charging stations are located on the campus of Morehead State University in Morehead, in the City Hall parking lot in downtown Richmond and at LG&E Center on Main Street in downtown Louisville. Not only are the facilities significant because of the enhanced accessibility they’re providing for EV drivers, they’re also powering LG&E and KU’s program to its goal, approved by the Kentucky Public Service Commission in 2016, of installing a total of 20 publicly-accessible charging stations across its service territories, with 10 in each.

“When we started this program, we had a vision of working to support customers’ interest in EVs by broadening charging infrastructure across the state, so they could have greater confidence should they choose to invest in one,” said Beth McFarland, LG&E and KU vice president of Customer Services. “Thanks to the partnership of numerous agencies, cities and organizations, the EV charging stations we’ve been able to install now represent about 20 percent of public charging stations available in Kentucky. As a company, we’re really proud of that, but we’re even more proud of what that means for current and prospective EV drivers traveling through the state.”

The utilities’ public charging stations are located as noted in the chart below.

LG&E EV Charging Stations	KU EV Charging Stations
<b>A.B. Sawyer Park</b> 9310 Whipps Mill Road	<b>Danville</b> 116 North 5th Street
<b>Butchertown</b>	<b>Elizabethtown</b>

1100 East Washington Street <b>LG&amp;E EV Charging Stations</b>	201 South Main Street <b>KU EV Charging Stations</b>
<b>Charlie Vettiner Park</b> Chenoweth Park Road	<b>Greenville</b> Muhlenberg Sports Park - 200 County Park Drive
<b>Crescent Hill Public Library</b> 2736 Frankfort Avenue	<b>Lexington</b> 159 East High Street
<b>Downtown Louisville</b> 220 West Main Street	<b>Lexington</b> KU Building - One Quality Street
<b>Downtown Louisville</b> 921 West Main Street	<b>Lexington</b> McConnell Springs - 416 Rebmann Lane
<b>Downtown Louisville</b> 315 East Main Street	<b>Lexington</b> 721 Press Avenue
<b>Highlands</b> 1523 Hepburn Avenue	<b>Midway</b> City Hall - 101 East Main Street
<b>Iroquois Park</b> Knoll Gate Road	<b>Morehead</b> Morehead State University - 121 East 2nd Street
<b>Seneca Park</b> 3101 Rock Creek Road	<b>Richmond</b> City Hall - 239 West Main Street

All of the stations are equipped with safety features, which include charging plugs that lock in the stand when not in use. They also have digital display screens and quick-pay options for a low effort customer experience.

While its public locations are now in place, LG&E and KU's EV Charging Station Program also offers interested eligible customers - including businesses, community entities and parking authorities - the opportunity to host their own electric vehicle charging stations in partnership with LG&E and KU. These stations would be available for public or private use based on the discretion of the hosting authority.

LG&E and KU continue to explore ways to support customer interest in EVs and related technology. The utilities meet regularly with state and local government agencies and other organizations as part of ongoing collaboration and feedback on the issues.
