

PPL Electric Utilities announces E-power lighting programs webinar

PPL Electric Utilities is sponsoring a free webinar on Sept. 23 to help its business, government and institutional customers take full advantage of the company's E-power lighting programs.

The online event, which will run from 9-10 a.m. EDT, is an effort to ensure larger, non-residential customers know about all the energy-saving opportunities and financial incentives available under the various E-power lighting initiatives.

"Lighting can be a significant portion of the energy bill for these customers," said Thomas C. Stathos, director of customer programs and services for PPL Electric Utilities. "The E-power lighting programs offer a variety of ways to help customers save energy and money, which can have a positive impact on their bottom line and the environment. This webinar will provide them with program information, and helpful tips for submitting the proper rebate forms and other documentation."

PPL Electric Utilities held a successful webinar in late June that provided an overview of E-power programs for business customers. "We had a lot of participation in that event, and we're pleased to be able to offer this as a follow-up," Stathos said.

To register for the webinar, go to <http://webinar.pplelectric.com>.

All customer groups, including residential customers, should remember that most rebate programs are retroactive to July 1, 2009. Funding is limited, however, so customers should act quickly.

For more information on all the E-power programs, visit www.pplelectric.com/e-power.

PPL Electric Utilities Corporation is a subsidiary of PPL Corporation (NYSE: PPL) that provides electricity delivery services to about 1.4 million customers in Pennsylvania. It has consistently ranked among the best companies for customer service in the United States. More information is available at www.pplelectric.com.
